VM 5400 / 6500

High Performance Vertical Machining Center for Die / Mold Machine

VM 5400/6500

Standard core features for high precision mold processing

The efficiency and competitiveness achieved by the user is optimised by the core features which are standard on the machine. These include face / taper contact spindle nose (BBT40), effective spindle cooling system and air blower for chip removal when dry cutting. These features contribute to the machine's capability to produce high quality dies and moulds.
Spindle
- 12000 r/min

Cam type ATC

Machining condition selection function

- It is possible to change machining condition in 10 steps by using R code at the program.
  - Improving productivity (high speed at rough machining, high precision at precision machining)
- NC parameter such as maximum feed and accelation time constant can be set automatically.

Maching condition		R1	R2	R3	R4	R5	R6	R7	R8	R9	R10
Result	Quality					Initial choice					
		Normal								Good	
	Tool life	Long								Normal	
Application		High speed								High quality	

High Rigidity

The highly-rigid body found on the VM series enables exceptionally heavy-duty machining.

High Rigidity Design

High Rigidity construction is achieved by 3D computer simulation.

Static rigidity

The high rigidity structure of VM series has raised the static rigidity up by 30% more than previous model with no weak point through FEM analysis.

Dynamic rigidity

Improving the frequency response and the damping ability of vibration makes it possible to increase the high eigenfrequency 30% up on the previous model.

• FEM analysis used to design a stable body. (FEM : Finite Elements Method)

The highly-rigid body structure is obtained by using the latest FEM analysis method, which optimizes the static and dynamic stiffness characteristics of the VM series. The resulting arch-shaped body structure provides an unrivalled level of rigidity, enabling an unsurpassed performance in heavy-duty machining.

Arch-shaped body
Broader Box Guideways

Compared to the previous models, the broader box guideways greatly improve the machine's dynamic characteristics.

Wider than previous Model

Improves the machining durability of the Z-axis.

Longer than previous Model
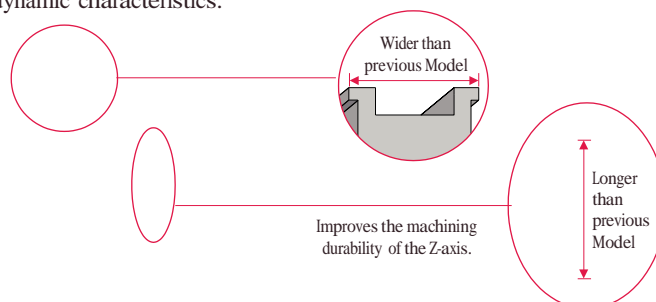

Scraping of surface

The sliding surface of each guideway is bonded with Rulon® 142 to reduce friction, then hand scraped for a perfect fit.

VM 5400 / 6500	
Z-axis Span width	22 %
Z-axis Span Length	32 %

High Speed / Precision Built-in Spindle

Since the main spindle is supported by 4 rows of P4 level high precision bearings, it maintains stable precision under high speed cutting operation for long periods. Moreover, the high torque 15.6 kW (20.9 Hp) direct connection type main spindle motor is equipped for high speed mold processing.
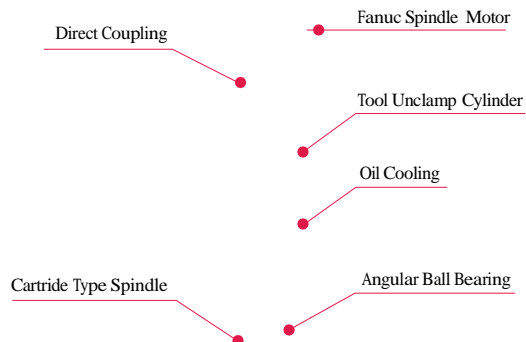

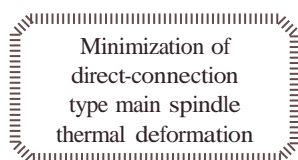

High Speed / Precision Built-In Spindle

3.0 mm (0.1 inch)
64 mm (2.5 inch)
Machining rate	1728 cm^3/min (68.0 in^3/min)
Spindle speed	6000 r/min
Feedrate	9000 mm/min (354.3 ipm)

- The above data was collected as a standard in accordance with test standards of our company, which can be changed.

Chip Disposal

Chip control is important to increase productivity and to enhance the operator's working environment.
The VM series offers many features to optimize chip disposal.

Chip Removal

Inner structure for effective chips and coolant flow
The inner structure of the Mynx series machines is designed to lead the flow of chips and coolant
into a front-mounted chip pan for effective chip disposal.

Flood coolant **std.**

Through spindle coolant **opt.**
Middle pressure   1.96 Mpa (284.2 psi) [20 bar]
High pressure   6.86 Mpa (994.7 psi) [70 bar]

Easy Operation Package

*EOP (Easy Operation Package)

Doosan's easy operation software package is customized to provide fast and easy operation for tooling, workpiece and program setup. These features maximize productivity by minimizing time lost during process setup.

Programming

G Code List

Operator can check the meaning of each G-code.

M Code List

Operator can check the meaning of each M-code.

Tool Data Registry Table

Operator can edit & check the tool number of the tool magazine pot.

Pattern Cycle

It is easy to make pattern cycle program by this funciton.

Calculator

Operator can calcute numerical formula in relation to arc and hole easily.

ENGRAVING opt.

It makes "Engraving" programming easy.

std. • Doosan Fanuc 32i-B
• 10.4" color TFT LCD
• Embedded Ethernet

Operation / Maintenance

Table Moving for Setup

Enables quick and easy table movement to either of three positions during setup.

ATC Recovery Help

Allows easy recovery of ATC from ATC alarm status.

Sensor Status Monitor

Solenoid valve and sensor status can be checked without the electric diagram.

Alarm Guidance

The alarm remedy method for selected important alarms is displayed on the screen.

Easy NC Parameter Help

Operator can check some useful parameters for easy operation.

Operation Rate

Manages working and operation times for each operator.

Tool Load Monitor opt.

Damage to tools is minimized by monitoring the axis and spindle load during cutting operations.

Renishaw Gui opt. Tool measure / Work measure

Tooling and the work piece measurement are operated through a conversational control screen.

*40 Tools   { } : opt.

Standard Feature

- Air blower
- Assembly & operation tools
- Automatic power off
- Coolant tank & chip pan
- Door interlock
- DSQ1
  (AICC II _ 200 Block + Machine condition selection function)
- Full enclosure splash guard
- Installation parts
- Portable MPG
- Screw conveyor
- Signal tower
  (red, yellow, green)
- Spindle head cooling system
- work light

Optional Feature

- 3th axis MPG
- 4th axis preparation
- Air dryer
- Automatic tool length measurement with sensor
- Automatic tool measurement
- Chip conveyor & chip bucket
- DSQ2
  (DSQ1+Data server [1GB])
- Mist Collector
- Rotary table
- Test bar (BT40)
- Through spindle coolant

• The specifications and information above-mentioned may be changed without prior notice.

NC Unit Specifications

FANUC 32i-B

AXES CONTROL

- Controlled axes	3 (X, Y, Z)
- Simultaneously controllable axes	
	Positioning(G00)/ Linear interpolation (G01) : 3 axes
	Circular interpolation (G02, G03) : 2 axes
- Backlash compensation	
- Emergency stop/overtravel	
- Follow up	
- Least command increment	0.001mm / 0.0001inch
- Least input increment	0.001mm / 0.0001inch
- Machinelock	All axes/ Z axis
- Mirror image	Reverse axis movement (Setting screen and M - function)
- Stored pitch error compensation	
	Pitch error offset compensation for each axis
- Stored stroke check 1	Overtravel controlled by software
- Absolute pulse corder	

INTERPOLATION & FEED FUNCTION

- 2nd reference point return	G30
- Circular interpolation	G02, G03
- Dwell	G04
- Exact stop check	G09, G61 (mode)
- Feed per minute	
- Feedrate override (10% increments)	0 - 200%
- Jog override (10% increments)	0 - 200%
- Linear interpolation	G01
- Manual handle feed 1 unit	
- Manual handle feedrate	x1, x10, x100 (per pulse)
- Override cancel	M48 / M49
- Positioning	G00
- Rapid traverse override	F0 (fine feed), 25 / 50 / 100%
- Reference point return	G27, G28, G29
- Skip function	G31
- Helical interpolation	
- DSQ1 (AICC II+ Machining condition selection function)	200 block preview
- Thread cutting, synchronous cutting	G95
- Program restart	
- Automatic corner deceleration	
- Feedrate clamp by circular acceleration	
- Linear ACC / DEC before interpolation	
- Linear ACC / DEC after interpolation	
- Rapid traverse bell-shaped acceleration/deceleration	
- Smooth backlash compensation	

SPINDLE & M-CODE FUNCTION

- M- code function	M3 digits
- Spindle orientation	
- Spindle serial output	
- Spindle speed command	S5 digits
- Spindle speed override (10% increments)	50 - 150%
- Spindle output switching 1st	
- Retraction for rigid tapping	
- Rigid tapping	G84, G74

TOOL FUNCTION

- Tool nose radius compensation	G40, G41, G42
- Number of tool offsets	64ea
- Tool length compensation	G43, G44, G49
- Tool number command	T2 digits
- Tool life management	
- Tool offset memory C	H/D code, Geometry / Wear memory
- Tool length measurement	

PROGRAMMING & EDITING FUNCTION

- Absolute / Incremental programming	G90 / G91
- Auto. Coordinate system setting	
- Background editing	
- Canned cycle	G73, G74, G76, G80 - G89, G99
- Circular interpolation by radius programming	
- Plane selection	G17, G18, G19
- Custom macro B	
- Custom softwear size 512kB	
- Extended P-code Variables size 512kB	
- Decimal point input	
- Reader / puncher interface	RS - 232C
- Inch / metric conversion	G20 / G21
- Label skip	
- Local / Machine coordinate system	G52 / G53
- Maximum commandable value	±99999.999mm (±9999.9999 inch)
- Part program storage size 256KB (640m)	256 KB
- No. of Registered programs	500ea
- Optional block skip 1	
- Optional stop	M01
- Program file name	32s
- Sequence number	N 8-digit
- Program protect	
- Program stop / end	M00 / M02,M30
- Programable data input	Tool offset and work offset are entered by G10, G11
- Sub program call	Up to 10 nesting
- Tape code	ISO / EIA Automatic discrimination
- Work coordinate system	G54 - G59
- Additional work coordinate system	G54.1 P1 - 48 pairs
- Coordinate system rotation	G68, G69
- Extended part program editing	
- Optional angle chamfering corner R	
- Macro executor	

OTHERS FUNCTIONS (Operation, Setting & Display, etc)

- Alarm display	
- Alarm history display
